Profile

T-shaped Senior Frontend Specialist with over 7 years of experience building scalable web applications. Highly autonomous and product-minded, I drive complex UI/UX architecture while easily bridging the gap to backend systems whenever the product requires full-stack execution. Proven ability to take complete technical ownership of features in high-stakes enterprise and Web3 sectors.

Education

Information and Communication Technologies. | Engineering

Tecnológico Nacional de México, campus Culiacán

08/2016 – 06/2019 Culiacán, Mexico

Intensive Full Stack Engineering | Bootcamp

Caffeine Labs (Tomato Valley)

06/2016 – 05/2017 Culiacán, Mexico

An afternoon workshop of three hours per day teaching Front End and Back End technologies.

Work Experience

Senior Web3 Frontend Engineer

Sati DeFintech

11/2025 – present Miami, United States

- Led frontend architecture for complex Web3 applications using React and TypeScript.
- Reduced user friction by 50% in heavy financial transactions using Redux.
- Integrated secure Web3 wallets like Privy and AMM interfaces for live data dashboards.
- Utilized Cursor and LLMs to rapidly prototype UI features and generate automated tests.

Senior Frontend Engineer

Agricompra

10/2020 – 11/2025 Culiacán, Mexico

- Led end-to-end architecture of a B2B platform using Angular 17 and PostgreSQL.
- Engineered complex buyer/seller transaction flows for quotes and partial deliveries.
- Implemented secure 3-D payments, XML invoicing, and strict role-based access limits.
- Accelerated feature delivery using AI tools and optimized CI/CD Bitbucket pipelines.

Full stack developer

Gamman Solutions

09/2019 – 10/2020 Culiacán, Mexico

- Migrated heavy Spring Boot reporting monoliths to high-performance React frontends.
- Maintained enterprise telephony operations built on Spring Boot and Apache Tomcat.
- Navigated enterprise deployments via TortoiseSVN, aligning closely with QA test paths.
- Migrated 10+ legacy Spring Boot reporting modules to high-speed React frontends.

Junior developer

Hunabsys R&D

05/2018 – 09/2019 Culiacán, Mexico

- Built gambling management apps with React, Rails, and Java, tracking geolocation.
- Developed UI for 500+ city surveillance cameras using automated plate recognition.
- Engineered robust B2B inventory and sales platforms in Ruby on Rails using Agile.
- Secured public sector health and administration legacy systems using CodeIgniter.

 Skills

- LANGUAGES		
English Professional	Spanish Native	
- FRONTEND & ARCHITECTURE		
React (v18/19) & Next.js Professional	TypeScript / JavaScript (ES6+) Full	State Management (Zustand/Redux) Professional
Tailwind CSS / UI/UX Professional	Angular & RxJS Full	
- BACKEND & DATA ENGINEERING		
PostgreSQL & Relational Data Professional	Node.js Full	Ruby on Rails Full
RESTful APIs / GraphQL Full	Java (Spring Boot / Android) Professional	
- AI-ASSISTED WORKFLOW		
Cursor & AI-First IDEs Full	Claude / Local LLMs (Ollama) Full	AI-Driven Prototyping & TDD Professional
Prompt Engineering Full		
- CLOUD, DEVOPS & WEB3		
Git & CI/CD Pipelines Professional	AWS (Cognito, S3) & Cloud Limited	Docker & Vercel Limited
Web3 (Solana, Flashnet) Professional		

 Volunteering

Full Stack Developer
Adagio

- 03/2025 – present Culiacán, Mexico
- **Pro Bono Technical Leadership:** Architected and developed "Adagio," a complete SaaS operational platform for a local dance academy, delivering enterprise-grade software pro bono to support community arts education.
 - **End-to-End Architecture:** Engineered the full stack utilizing React, TypeScript, and PostgreSQL, independently managing everything from complex database concurrency (pessimistic locking) to a highly responsive frontend UI.
 - **AI-Accelerated Delivery:** Natively integrated an AI-first workflow using Cursor and Claude to rapidly prototype features, automate testing suites, and drastically accelerate the delivery of administrative modules without compromising architectural integrity.

 Strengths

Product knowledge	Architectural Ownership	AI-Accelerated Delivery	System Modernization
Full-Lifecycle Development	Enterprise Scalability	Performance Optimization	Product-Minded
Highly Autonomous	Cross-Functional Adaptability	Agile Problem Solving	Business-Centric Engineering
Technical Mentorship			

 Hobbies

Experimenting with Local LLMs

Strength Training
